West Fork Road Reopened

Landslide Correction Completed

West Fork Road between Montana Avenue and Shepherd Road is now open to through traffic.

The City of Cincinnati Department of Transportation and Engineering (DOTE) designed and managed the construction of a drilled pier retaining wall to stabilize the roadway. Trend Construction, Inc., the contractor, completed the project two weeks ahead of schedule. The roadway, which was damaged and partially closed by a landslide in March, has been stabilized by the installation of thirty-seven drilled piers extending into the shale and limestone bedrock.

The Department of Transportation and Engineering oversees the rehabilitation and improvement of streets in the City of Cincinnati. The Department is also responsible for transportation planning, design, engineering services, structural and geotechnical services, right of way regulation, and construction management.
